Subject: RE: Grumman meeting in July

I don't object if you want to check with the water districts but if the main purpose is discuss the disposition of treated water, we are not ready. The Navy white paper was only received last week and while we are only starting to look at it, it is not really what we expected and will need some revision before we can engage DOH more that we already have. As far as your updates – see below. I don't have any info about Bob's schedule for Sept so I suggest that you suggest a couple based on Catherine's schedule. I did get a call from Lora this AM – they need to know if we are going to hold the meeting. I told her that I didn't think it was likely. Jim H

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

What do you guys think about checking in with MWD and BWD and see whether they are feeling the same way.

Just thinking that if we went out with a recommendation to defer the meeting until September maybe we would want to provide a very brief update on things e.g. a couple of quick bullets on the following:

- OU3 well installation – installation of RW21 and VPBs for RW22 started on July 13. Town of Oyster Bay has not issued permits for RW 20 and NG is working with affected residents and will resubmit permit application by Aug 1
- White paper – Received from Navy on Jul 11 and under review. Revisions are likely needed
- Next steps for CSIA sampling—(will Pace or DEC respond to comments)—do we want to have a call to discuss comments and whether there is any benefit to additional work. Comments from EPA received on July 14 and distributed to WD's. MWD indicated that they will have comments in a week or two

We should probably also offer up dates for a September meeting (knowing that we will need to check in with DOH on their availability at some future date); I'll check Catherine's calendar.

Have a good weekend.

Doug – I spoke with Bob. Discussions relative to disposal options of treated water have not progressed to the point that holding a meeting on July 26 would be a good use of everyone's time. We recommend that it be postponed. Jim H
